

16th Edition of European Gastroenterology and Hepatology Congress

Jessica Aubrei

Visiting Professor of Psychology, Southern Federal University, Rostov-on-Don, Russia, Professor of Finance and Psychology in SIAS-CIAPS (Centre for International Advanced and Professional Studies), E-mail: jpajimna@yahoo.com

Gastroenterology is the study of the normal function and diseases of the esophagus, stomach, small intestine, colon and rectum, pancreas, gallbladder, bile ducts and liver. Gastrointestinal Immunology mainly focus on differentiation of gut-associated lymphoid tissue, regulation of innate and adaptive immune cell differentiation and function, genetic and epigenetic factors regulating immune responses and inflammation. It also gives idea about the clinical research, clinical trials and epidemiology studies on gastrointestinal inflammatory diseases including gluten-ensitive enteropathy, inflammatory bowel disease, and gastritis, malabsorption syndromes, diarrhea, gastric and duodenal ulcers and disease of the salivary glands excluding cystic fibrosis. The immune reaction of the gastrointestinal tract to the external stimulus or the failure to respond is the most important aspect of the gastrointestinal tract system. The gastrointestinal (GI) tract contains the largest mass of immune cells in the body. Scientific progress in the area of gut immune system and the immune abnormalities includes the latest developments in organ transplantation of the liver and gut. HIV infection in the gut and H. pylori gastritis are the recently discovered disease.

Gastrointestinal motility is described by the movements of the digestive system, and the transit of the contents within it. Gastrointestinal Disorder is the disorder related to gastrointestinal tract mainly the [Oesophagus](#), stomach, intestines, rectum and the accessory organs of digestion, like liver, gallbladder, and pancreas. The conditions of gastrointestinal disorders include constipation, irritable bowel syndrome, haemorrhoids, anal fissures, perianal abscesses, anal fistulas, perianal infections, diverticular diseases, colitis, colon polyps and cancer. Some of the major symptoms of GI disorders are Cramping, abdominal pain, inflammation of the large and small intestine, chronic diarrhea, rectal bleeding and weight loss. Many of these can be prevented or minimized by maintaining a healthy lifestyle and submitting to cancer screening.

The Facts and Facets of Gastroenterology and Hepatology and the most recent research are going to be illustrated by Eminent Scientists/ Research Professors in the field Gastroenterology and Hepatology, Junior/Senior research fellows, Students, Directors of Gastroenterology and Hepatology research companies, Members of Gastroenterology and Hepatology associations and exhibitors from health Industry/Plastic Industries to magnifying scientific knowledge by sharing the research and ideas. After our 15th International Conference on

Gastro Education", successfully completed on June 17-18, 2019 in Tokyo, Japan So we are looking forward to continuing our success and we once again taking the liberty to welcome you at our new destination in London, UK from June 15-16, 2020 for our coming Event 16th Edition of European Gastroenterology and Hepatology Congress organizing by EuroScicon Pvt Ltd. (Gastroenterology and Hepatology).

On the behalf of our OCM Dr. Jessica Aubrei, from Veterans Memorial Medical Center, Philippines. We cordially invite all the participants from all around the world to take part in this esteemed conference. Join us to witness invaluable scientific discussions and add to the future advancements in the field of Gastroenterology and Hepatology in the upcoming "16th Edition of European Gastroenterology and Hepatology Congress" is going to be held on June 15-16, 2020 in London, UK.
