Awards on EuroSciCon Conference on Green, Sustainable & Environmental Chemistry

Tofik Nagiev

Vice-president, Department of the Physical and Colloid Chemistry, Azerbaijan National Academy of Sciences, Azerbaijan, E-mail: tnagiev@azeurotel.com

Outstanding Researcher: His respect is the most noteworthy degree of our respect known as the "Outstanding Researcher Award". Who has significantly influenced Green Chemistry and has more than 15-20 yrs. of association with this field and dispersed more than 200-300 research papers in reputed general journals and made noteworthy responsibilities to the disclosure or headway of new medications. Who have various sorts of research, indicating experiences and a noteworthy impact on the insightful and speculative headway in the field of Green Chemistry. Picked individuals can be used in any association, school, government or a private research affiliation.

Professional Level: This honour is the most elevated level of our honour known as the "Privileged Award". Who has majorly affected Green Chemistry and has more than 15-20 yrs. of involvement with this field and distributed more than 200-300 research papers in presumed worldwide diaries and made significant commitments to the revelation or advancement of new research. Who have numerous sorts of research, showing encounters and a significant effect on the scientific and hypothetical advancement in the field of Green Chemistry. Chosen people can be utilized in any organization, college, government or a private research association.

Young Scientist: This honour is known for the "Best Young Scientist". The honour, given to perceive fundamental commitments by youthful researchers to Green Chemistry field. Competitors must be a graduate student under studies or postdoctoral scientists at a scholarly organization, private or government look into establishment and must have a key job and a commitment to an examination venture of Green Chemist field.

Women Scientist: Our meeting conveys a one of a kind stage for ladies researchers for introduction their new research ventures with an examination. This honour is known for the "women of Science Award". We heartily welcome ladies specialists and researchers from any Universities/Industries/Research association to who have over 10 years of research involvement with green chemistry field to join the discussion. We are happy to help our women scientist’s individuals through research awards and offer assistance to ladies analysts in vocation advancement. This honour will be given to the best ladies researcher among all women members in the meeting. This is an incredible possibility for women researchers get this honour in joining our gathering.

Outstanding speaker: This honour, given to the best speaker among the all speakers who are going to the gathering to introduce their examination theory, extends that have been executed to improve long term greatness in Green Chemistry.

Best Speaker: This honour will be given to the best speaker among all speakers who are going to in the gathering.

Whose exploration works have a critical greatness in the field of Green Chemistry for improving the long term greatness

Best Poster: This honour, given to the poster presentation members who will be given best poster presentation before all members in the meeting. Every single acknowledged conceptual will be displayed at the publication sessions during the meeting before all members.

Outstanding Thesis: This honour is recognizing for Masters/Ph.D./Post Doctorate examine work introduction who will exhibit their activities and postulation that have been seemed to improve long term significance in the field of green chemistry. You can assign online for meriting this honour.

Best Discovery: Best Discovery award criteria in Green Chemistry 2020 will be the participant who has discovered new innovations related to technology of Green Chemistry field. Comparing all the discoveries presented in the conference, committee will announce best discovery award among all the participants.

Best YRF: Best YRF award criteria in Green Chemistry 2020 will be the participant who is a Student speaker with outstanding academic excellence or who has the research record under 5 years in the Green Chemistry field with the above criteria including based on the presentation in the conference committee will announce best YRF award among all the researcher participants.
