

## 24th Global Congress on Biotechnology February 24-25, 2020 London, UK

Klaus Ammann, Email:klaus.ammann@ips.unibe.ch , University of Bern, Switzerland

Biotechnology is the area of biology that uses organisms, living processes or systems to manufacture products or technology intended to improve the quality of human life. Depending on the technology, tools and applications involved, biotechnology can overlap with molecular bionics, biology, genetic engineering, bioengineering, and nanotechnology. By harnessing cellular and bio molecular processes, scientists can make advances and adaptations to technology in various fields. Traditional processes include using living organisms in their natural form, breeding new living organisms or modifying their genetic makeup. Successful applications of such processes have resulted in treatment of disease, environmental impact reduction and more efficient use of natural resources. Major biotech companies implement biotechnology as a practice to bring medical devices and products to the mainstream market.

Biotechnology 2019 witnessed an amalgamation of peerless speakers who enlightened the crowd with their knowledge and confabulated on various new-fangled topics related to the field of Biotechnology. Klaus Ammann, University of Bern, Switzerland presented a Keynote speech on "Regulatory Hurdles Of Gene Editing, How To Overcome Them", It provided a platform for collaboration among colleagues, vendors, and academia to reveal new innovations, solutions, ideas, and emerging technologies in Biotechnology.

With the grand success of Biotechnology 2019, we are glad to announce our next upcoming conference Biotechnology 2020 at London, UK on February 24-25, 2020. The conference will serve as a platform to bring together leading Biotechnologists with different specialties such as agricultural and medical etc. Biotechnology Congress will discuss on the topics such as topics such as Pharmaceutical Biotechnology, Plant and Agriculture Biotechnology, Stem Cell Biotechnology, Microbial/Industrial biotechnology, Algal Biotechnology, Medical Biotechnology, Environmental Biotechnology

The global biotechnology market is expected to reach USD 727.1 billion by 2025. The emergence of certain key themes in the biotechnology market is expected to drive growth in this industry to a lucrative extent. These key themes include regenerative medicine and genetics in diagnostics. Presence of a plethora of companies focusing on the development of regenerative therapies is anticipated to drive sector growth through to 2025.

Global Biotechnology Conferences going to be held during January, 2020 to December, 2020 at various cities in Europe (London, Barcelona, Madrid, Valencia, Rome, Milan, Berlin, Frankfurt, Vienna, Zurich, Dublin, Edinburgh.... And Many More..!!!
