

8th Edition of International Conference & Exhibition on Pain Management, Physiotherapy & Sports Medicine

Simmonn Alllen

Director, Fine treatment , UK, E-mail: finnetreatment@yahoo.com

Name of the Conference: [Pain Management 2020](#) | 8th Edition of International Conference & Exhibition on Pain Management, Physiotherapy & Sports Medicine | **March 18-19, 2020** | London | UK

Major Keywords: [Pain Management Conferences](#) | [Pain Management 2020](#) | [Pain Management Meetings](#) | [Top Pain Management Events](#)

Information about the previous conference:

On completion of successfully organizing 2019 conference with prominent scientists and keynote speakers. The conference was a huge success which unites a one of a kind and worldwide blend of substantial and medium Pain Management and its related organizations, leading universities and clinical research companies making the meeting an ideal stage to share understanding, encourage coordinated efforts crosswise over industry and the scholarly community, and assess rising advancements over the globe.

Details about the conference:

The Pain Management 2020 aims in bringing Pain management, Pain Management Exhibitors together from different parts of the world. World Pain Management Congress aims to create a platform to have a knowledgeable discussion. The pain management conference has [KEYNOTE SESSIONS](#), [HANDS ON WORKSHOP](#), [SYMPOSIUMS](#), [SPECIAL SESSION](#), [SPEAKERS](#), and [POSTER PRESENTATIONS](#).

The session presented at the conference have research value and renders a great knowledge related to the field of **Pain management**. Meet noteworthy Pain management, Pain Management Researchers and Clinicians. So come and join leading experts and allied professionals from **March 18-19, 2020 at Berlin, Germany** to keep up with the rapidly accelerating pace of change that is already having an impact on the field of Pain Management and will continue to in the future.

Pain Management deals with the diagnosis and sub-surgical procedures for the management and treatment of disorders/diseases related to the pain management system, i.e. veins, arteries and the lymphatic system, excluding the

coronary and intracranial arteries. A pain management surgeon is concerned with treating the blood vessels of the body including arms, legs, organs and other tissues of the body, except that of heart and brain. Pain Managements advised when a pain management disease cannot be treated by less invasive or non-surgical methods. The purpose of Pain Managements to treat those diseases related to veins and arteries known as arterial and venous diseases. Pain management diseases are caused due to the conditions like clotting of blood in blood vessels, weaken blood vessels or damaged valves which control the flow of blood within the veins thus depriving of vital nutrients and oxygen. Common pain management diseases are atherosclerosis, aortic aneurysms, peripheral pain management disease, carotid artery disease. Surgery is often suggested to treat such diseases to aid prevent strokes or heart attacks, relieve angina or hypertension, eradicate aneurysms, improve claudication by repairing the arteries, bypassing, or replacing them. Atherosclerosis i.e., the hardening of arteries occurs as people age due to the accumulation of fatty material containing cholesterol or calcium on the innermost layer of artery; cause the narrowing of the inside diameter of the blood vessels. Gradually, the blood vessels become so narrow that blot clots (thrombus) forms which blocks the blood flow to the entire portion of the body; creating the condition known as PVD or peripheral arterial disease. In another form of atherosclerosis, ulcer forms in the diseased interior of the blood vessels where blood clots tend to form. These blood clots then break the ulcer and block the arteries in the narrower ends.

Target Audience:

The target audience will be mostly Pain management and Residents but also General Surgeons, Angiology Specialists, Phlebologists, Interventional Radiologists, Pain management Medicine Specialists, Dermatologists, Nurses, Technicians and all others interested in the management of venous and arterial diseases.

Conference Highlights:

- Pain management Trauma

- Venous Surgery
- Pain management Diseases Of Lower Limb
- Carotid Artery Diseases
- Pain management Diseases Of Upper Limb
- Abdominal Aortic Aneurysms
- Thoracic Aortic Pain management
- Thoracoabdominal Aortic Pain management
- Surgery for Veins and Lymphatic Diseases
- Pain management Imaging
- Pain management Malformations
- Acute Ischemia
- Renopain management
- Mesenteric Ischemia
- Congenital Diseases Of Vasculature
- Lymphedema
- Venous Insufficiency
- Pain management Bypass Grafting
- Techniques Of Open Pain management
- Anesthesia For Pain management
- Anesthesia For Pain management
- Lower Limb Amputations
- Endopain management
- Pain management Cell & Molecular Biology
- Cardiopain management
