### Editorial

"12th International Conference on Food Microbiology is dedicated to bring together a significant number of global leaders and scholars, academics and industry researchers for presentation within the conference program which is going to be held on October 19-20, 2022 at Vancouver, Canada.

Food Microbiology 2022 aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Food Microbiology, Quality, Safety, Security, Management and Hygiene Policies. It also provides a premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Food Microbiology, Quality, Safety, Security, Management and Hygiene Policies.

The food Market was valued at USD 12.95 billion in 2017; it is projected to grow at a CAGR of 6.7%, over the forecast period from 2017 to 2022. With this CAGR, the market is estimated to grab a value of US\$70,510.1 by 2022 end. The food market is gaining traction on the back of booming processed and packaged food & food microbiology sector globally. Increasing health consciousness among consumers has led to the change in preference for dietary requirements globally and also in the developing countries. The trend of automation within the food and food microbiology sector is propelling growth of the global food processing equipment market. Increasing demand for easy to cook or ready to eat food products, demand for the bakery and confectionery products is increasing. Owing to the large demand, the bakery and confectionery segment is likely to achieve value of US\$20,000 by the end of the forecast period.
