

Announcement of 19th world congress on materials chemistry & nano materials

AHMED M. SENAN

Nanjing Agricultural University, China.

Editorial

"21st World Congress on Material Chemistry & Nano Materials" held in Dubai, UAE. With the theme "An Approach to Better Understand Materials Chemistry & Nano Materials" Material Chemistry 2022 focuses in report data and offer earth shattering considerations among the specialists, industrialists, and understudies from research regions of Materials Chemistry and Nano Materials to share their assessment experiences and appreciate natural discussions and particular gatherings at the event. The Conference will moreover have a space for associations and foundations to present their organizations, things, advancements and investigation results. This fuses brief keynote presentations, Oral talks, Poster presentations and Exhibition. Which will be the best gathering gave to Material Chemistry & Nano Materials focusing on "An Approach to Better Understand Materials Chemistry & Nano Materials " and gives a head particular get-together to declaring and getting some answers concerning the latest imaginative work, close by looking at new applications and advances. Events fuse intriguing issues presentations from wherever on over the world and master frameworks organization with organizations, driving working get-togethers and sheets. Meet Your Objective Business zone with individuals from and around the globe concentrated on finding a few solutions concerning science, Extensively acclaimed speakers, the latest procedures, techniques, and the most best in class upgrades in Polymer science and Engineering indicate this get-together.
