### Editorial

Meetings International extends our immense pleasure and honoured to invite you to attend the “International Conference on Robotics” will be hosted during August 22-23, 2022 in Singapore City, Singapore. This conference focusing on the theme “Explore New Advancements and Innovations in Robotics” unite Researchers and Scientists, mechanical designers, electrical specialists, software engineers, gaming experts, brilliant trailblazers, youthful analysts, business delegates from all over the world, which would provide a platform to discuss and enhance expertise ideas and exploration for future research aspirants in various fields of Robotics.

Robotics 2022 Conference illuminates provocative subjects and late research in the field of Robotics, Mechanical Engineering, Electrical and Electronics Engineering, Computer Engineering, Automation, Sensors, Control Systems and some more. In particular, this gathering will inspire junior and young delegates by partner with specialists in their logical fields and by empowering them and improving their trust in showing research on a universal stage. The key objective of Meetings Int. is to provide the communication between science and engineering research among the Academic and Industrial Community.
