### Editorial

We are delighted to announce our upcoming International Conference on Virology & Immunology invites you with regards to the aim on research, innovation, and scientific aspects. The conference is going to be held at Vancouver, Canada on June 15-16, 2022. The theme of the conference is "Emerging Viral diseases and their treatment techniques".

Virology 2022 is a global platform for Pathologists, virologists, industry professionals, marketing professionals and researchers, scientists, clinicians, academics, students, Liver oncologists, Surgeons, Research scholars and other healthcare professionals. The primary goal of the conference is to promote the latest advancements, research and developments, exploring the challenges in Virology and Bacteriology related areas and share innovations and ideas on pathology for a greater development and more effective treatments.

Virology is the scientific discipline concerned with the study of the microbiological or pathological science which involves the study of viruses and viral diseases, including the distribution, biochemistry, disease producing properties, physiology, molecular biology, ecology, cultivation, evolution, genetics and clinical aspects of viruses. Virology explain about the interaction with host organism physiology and immunity, the diseases they cause, the techniques to isolate and culture them, ways to infect and exploit host cells for reproduction, and their use in research and therapy.

The global virology market is estimated at \$1693 million in 2017 and is estimated to grow at a CAGR of 5.4% during the forecast period 2018-2023. North America is the leading market holder driven by world class healthcare substructure with technological advancement practice. Asia-Pacific is likely attaining highest growth due to growing healthcare tourism in the nations of China and India. Hospitals and the Laboratories are the most dominating end-use segments
