Editorial

We welcome all the enthusiastic researchers from all around the world to join us for the [8th Global Summit on Recycling and Waste Management](#) is going to be held on March 21-22, 2022 in Berlin, Germany. This Recycling conference will furnish a sturdy and energetic manifesto and it also focuses to boost the refurbishment of spectra of "Challenges & Practices on Recycling and Waste Management".

We are arranging stage with the vast majority of speakers and business crowd structure everywhere on the globe. This recycling conference is a principal address for Presidents, Founders, Business delegates, Scholastic workforce, Young researchers, and talented understudy bunches from universities and research labs giving an ideal space to share the latest progressions in Recycling & Waste Management.

Recycling Conference is mainly focusing on the topics relevant to Recovering energy from waste, Waste separation, Waste water treatment methods, Climate changes, Water, Waste and Energy Management, Zero waste concepts, E-Waste Management, Biogas production, Composting, Food Waste Prevention, Global Warming and Industrial waste.

Why attend the plastics recycling conference?

- Learn the latest on the critical market shifts and other factors influencing the fast-evolving world of plastics recycling and sustainability.
- Connect with plastic processors, buyers and sellers of recycled resin, equipment suppliers and other potential business partners.
- Hear the latest from global brands and others on their plans to hit plastic sustainability goals.
- Experience the industry's most lively trade show hall, featuring top vendors, plastics recycling firms, trade associations and others.
- Take part in unique networking opportunities that can only happen when the entire sector is gathered in one place.
