Announcement

First and foremost, we'd want to thank the Open Access Journal's reviewers and writer for their efforts. Over 25 prominent experts collaborate with the Journal of Annals of Biological Sciences to provide high-quality publications in the field of parasitic illness.

To guarantee uniformity in the peer-review process, we employ an Editorial Tracking System, which is an online manuscript submission, analysis, and tracking system. Each citable paper must be evaluated by at least two independent reviewers before being approved by the publisher. Review processing is done by members of the Journal's editorial board or outside specialists.

We are very thankful for our board members' invaluable contributions to both our rigorous companion audit methodology and the Journey's crucial advancement. Reviewer and Editorial Board Members, as everyone knows, play a critical role in encouraging the editors and reviewers' willingness to maintain high standards of informational excellence in the work we disseminate.

The Journal community is made up of global specialists in comparable logical distributions. All submitted papers go through numerous steps to guarantee uniformity in delivery. The compositions are audited in the same way that other documents are. The unlimited supply of paper is a good place to start when screening. In any instance, two free references are included with the appropriate articles.

The COVID-19 outbreak has caused significant disruption, creating issues for everyone. While coping with the influence of this pandemic ailment on their day-to-day life, some researchers/technicians are also dealing with difficulties such as laboratory closures and the organisation of online education. Many of the writers, reviewers, and publishers of various magazines are still working as doctors in the midst of the pandemic. As a result, delays are unavoidable during this epidemic period, and we appreciate your patience. It is critical that our Editors and Editorial Advisory Board debate the issues we disseminate and reflect the nations from where our submissions originate. Moreover, biological sciences which includes all the Agric. Engineering and Technology, Agronomy, Anatomy, Behavior, Biochemistry, Biological Sciences, Biometry, Biosciences, Biomechanics, Psychology, Botany, Cell Biology, Clinical Sciences, Conservation and Management of Ecosystems, Crop Sciences, Cytology, Development and Differentiation, Ecology, Environmental Sciences, Evolutionary biology, Fisheries and Aqua-Sciences, Food and Nutrition Sciences, Forestry etc.
