

Construction and evaluation of advanced nursing practice course for postgraduate students in nursing

Yuan-yuan Song*, Xiao-lian Jiang

West China School of Nursing, Sichuan University, China

Abstract

In China, nursing postgraduate education started relatively late, without a systematic and a unified core knowledge system, each school has its own curricula, and nursing-specific courses are limited. Many schools are still using clinical medicine specialized courses as their major courses, only a few schools have established courses related to advanced nursing practice.

4. “Ratoon rice generated from primed parent plants exhibit enhanced herbivore resistance”

5. “Differential morphological, cytological and biochemical responses of two rice cultivars to coumarin”

[3rd Annual Conference on Pediatric Nursing and Healthcare;](#) Webinar- April 29-30, 2020.
