

Creating and Sustaining a National Quality and Safety Network for Italian National Federation of Radiographers and Technical, Rehabilitation and Prevention Health Professions

Matteo Migliorini

Italian national federation of radiographers, Italy

Abstract

All healthcare professions are committed to quality and safety, but not all have organised to unify their constituencies in systematic ways to identify and address quality and safety gaps. The Italian National Federation of Radiographers and Technical, Rehabilitation and Prevention Health Professions (220,000 members, representing over 15 professions) committed through a member driven network to transform and continuously improve safety and quality for the Italian population. Federation main big aim and pledge are to create and sustain a structured quality and safety network for safer-safest care for all Italian National Healthcare System through engaging all healthcare professionals affiliated and disseminating the latest evidence-based quality and safety science principles translating into practice in daily work. After this session, participants will be able to how to create and sustain a national patient safety network for healthcare multidisciplinary professions and identify strategies and tools to translate evidence into practice through a healthcare professional network and learn how to create, sustain and maintain safety and reliable outcomes
