

## Editorial 3 Nursing

James Okeya

Critical Care Nurse in Pediatric ICU, A.I.C Kijabe Hospital, Nairobi, Kenya, E-mail:[jamesorengel1@gmail.com](mailto:jamesorengel1@gmail.com)

A substantial increase in the geriatric population across the globe has strengthened the demand for skilled nursing care services worldwide. The increasing number of patients suffering from Alzheimer's along with high incidence of dementia, a common form of Alzheimer's, is one of the key factors fuelling the growth of global skilled nursing care services market. On the basis of geography, Asia Pacific, North America, Europe, and Rest of the World are the key segments of the global skilled nursing care services market. North America holds the foremost position in the global skilled nursing care services market as an increased awareness about the significance of skilled nursing care services, infrastructural development, provision of reimbursement coverage, and a well-defined regulatory framework are driving the market's growth. On account of the rising prevalence of diseases, the U.S. is the leading country in the North America market. Europe ranks second in the regional segment because of high healthcare expenditure coupled with elevated sense of awareness about these services.

The growth of medical tourism in Asia Pacific will also benefit the market for skilled nursing care services. Some of the key players operating in the global skilled nursing care services market are Lincare, Inc., Apria Healthcare Group Inc., Golden Living, Emeritus Corporation, Genesis Healthcare., Sunrise Senior Living Inc., Sun Healthcare Group Inc., Gentiva, and Life Care Centers of America, Atria, Brookdale Senior Living, and Extendicare, Inc. It is expected that Asia Pacific will exhibit immense opportunities.

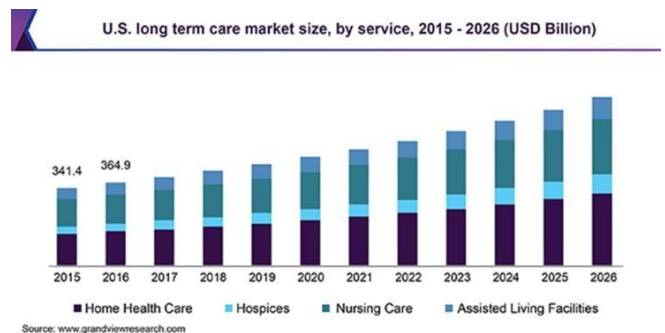

The global patient monitoring device market reached \$15.9 billion and \$16.9 billion in 2014 and 2015 respectively. The market should reach \$23.8 billion in 2020, increasing at a compound annual growth rate (CAGR) of 7.1% from 2015 to 2020.

The global market for elder-care technology products was valued at \$3.7 billion in 2014. This market is expected to grow to \$10.3 billion in 2020 from nearly \$4.4 billion in 2015, at a compound annual growth rate (CAGR) of 18.8% from 2015 to 2020.

### Funding on Nursing

Allocation of funds is based on the quality of the proposed research, the future promise of the applicant, and the applicant's research budget. Annual funding for this grant is provided by the Sigma Theta Tau International Foundation for Nursing's Patricia E. Thompson Giving Circle donors. Preference will be given to Sigma Theta Tau members, other qualifications being equal. Funds for this grant do not cover expenses incurred prior to the funding date.

As one of the 27 Institutes and Centers at the National

Institutes of Health (NIH), the National Institute of Nursing Research (NINR) funds research that establishes the scientific basis for quality patient care. Often working collaboratively with physicians and other researchers, nurse scientists are vital in setting the national research agenda. Nursing research is a critical compliment to biomedical research, as it investigates how to prevent disease and promote healthy living.

NINR's Fiscal Year (FY) 2016 funding level of \$146 million is approximately 0.45% of the overall \$32.1 billion NIH budget. Spending for nursing research is a modest amount relative to the allocations for other health science institutes and for major disease category funding.
