

16th World Bioenergy Congress and Expo

Muhammad Usman

Former Director General of Agricultural Research System Pakistan Agricultural Research Pakistan , E-mail: usmankhan1949@yahoo.com

Bioenergy is renewable energy made available from materials get from the natural beginning. Biomass is any natural issue which has kept sunlight as mixture energy. As a fuel it might contain wood, straw, wood squander, sugarcane, compost, and numerous other results from various farming procedures. In its most select since it is an equivalent word to biofuel, which is fuel gotten from organic sources.

In its more extensive sense, it incorporates biomass, the organic issue used as a biofuel and in addition the social, logical, financial and specialized fields related to using natural hotspots for energy. This is a typical doubt, as bioenergy is the energy developed from the biomass, as the biomass is the fuel and the bioenergy is the energy put away in the fuel.

Dr. Muhammad Usman from Former Director General of Agricultural Research System, Pakistan to present a session on "Biofuels and Bioenergy is the major industry for the development of health, basic need of daily life, create employment, generate income, stronger economy, reducing financial crises, global Poverty and hunger in the developing countries of the world particularly in south Asia".

Ms. Jinghui Liang, from MSCA-FIRE PhD Fellow, University of Bath, UK, to present a session on "Tackling Carbon Catabolite Repression in *Parageobacillus thermoglucosidasius*"

According to the new market research report, the gastrointestinal infections advertise was USD 19.79 billion in 2016 and expected to reach USD 20.68 billion by 2022, developing at a CAGR of 2.3% amid estimate period.

Biofuels Conference is glad to schedule the **16th World Bioenergy Congress and Expo on October 12-13, 2020 in Zurich, Switzerland..**

Journal: **Journal of Fundamentals of Renewable Energy and Applications**
