Pediatric Nursing is the restorative care of neonates and child up to puberty, as a rule in an in-patient clinic or day-clinic. Neonatal nurses are registered nurses who have some expertise in working with those youthful, vulnerable patients. Pediatric nursing is a branch of health care that mostly centers in giving care and support for new born babies who were born prematurely, or suffering from health problems such as birth defects, infections, or heart deformities. Numerous neonatal nurses work in Neonatal Intensive Care Unit (NICU), giving very particular medicinal care to in danger infants.

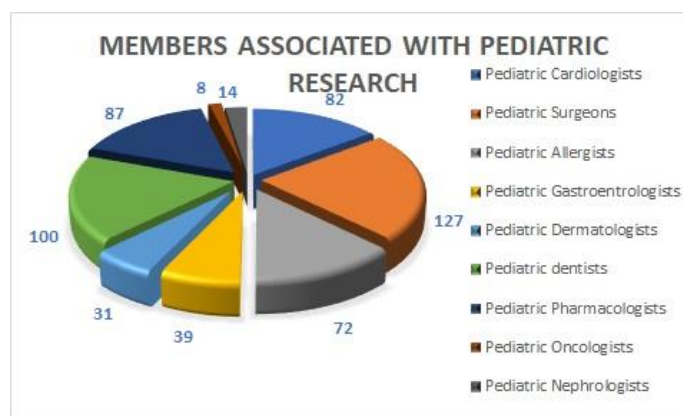

Healthcare 2020 is basically based on the aim to gather different scientists, Pediatricians, Chemists, Physicians from all around the globe at a place where they can share their expertise on the latest innovation and new technologies and researches in the field of Pediatrics and Healthcare.
