

# Left Ventricular Performance Following Swim Training in Egyptian Wheelchair Swimmers

Magdy Abouzeid

University of Alexandria, Egypt

## Abstract

**Introduction:** Athletes with special needs represent a growing population of sports participants. The Special Olympics is an international organization dedicated to empowering individuals who have physically and intellectual disabilities to become physically fit through sports training and competition. Subjects with paraplegia and amputation don't use their legs in their daily lives which may affect myocardial efficiency. According to the law of use, so, not using the legs is considered to be amongst the factors affect the cardiac deficiency in general.

**Purpose:** The aim of these study is determined and compared myocardial responses to intensive training (IST), 24 weeks, 6 times per week, 120 min per unit in male wheelchair swimmers (amputee vs. paraplegic).

**Received:** June 07, 2022; **Accepted:** June 15, 2022; **Published:** June 26, 2022
