

## World Summit on Genetics and Genomics

Higinio T. Mappala

Full-time Medical Specialist IV and Administrator, Jose Reyes Mem. Medical Center, Manila, Philippines, E-mail: [genemapmd@yahoo.com](mailto:genemapmd@yahoo.com)

We take great pleasure in welcoming Geneticist, Genomics Scientists, Pharmacology Scientists, Pharmacology Health Professionals, [Genetics Associations](#) and Societies, Genetic Counselors, Bio pharmacists, academicians, scientists, researchers, students and experts of application fields to the [World Summit on Genetics and Genomics](#) going to take place on **July 27-28, 2020 in Madrid, Spain** to foster the progress in the field by contributing with your expertise to what vows to be a very comprehensive and energizing gathering, and to appreciate and to enjoy the immense special artistic heritage and awesome landscape of Spain.

The theme of the Conference “[Exploring Novel Therapies in Genetics and Genomics Research](#)” will underpin the need for collaboration and cooperation of individuals from a wide range of professional backgrounds. It aims to promote awareness and enhance research aiming in [developing solutions](#) for the various **Genetics and Genome Research** encountered.

Conference Series will be hosting [World Summit on Genetics and Genomics in 2020](#). This exciting occasion is planned during July 27-28, 2020 at Madrid, Spain endeavors to bring numerous Prominent Speakers, Professors, Deans, Surgeons, Physicians, Medical and [Industrial Professionals](#), Young Researchers, Student Delegates and Business Delegates, alongside information-packed Workshops, will fill the agenda. [Genetics and Genomics](#) 2020 will provide a wonderful experience that will strive to offer plenty of networking opportunities, providing you with the opportunity to meet and interact with the driving researchers and scientists, friends and colleagues as well as [sponsors and exhibitors](#).

The meeting will concentrate on the standards of [Genetics](#) and Genomics in health care services, to distinguish clinically noteworthy genetic deviations from influenced organ of patient, and demonstrative genetic data from influenced organ to foresee ideal treatments, determination of quicker [advancement of genomics](#) customized prescription to furnish patients with precision drug and furthermore to get application and constraints genomic drug in pre-birth genetic screening and diagnosis, advancements and their utility, constraints, genetic and ecological

hazard factors for complex [genetic disorders](#), design and elucidation of genome-wide association studies, pharmacogenomics, full genome sequencing for illness gene discovery, populace structure and genetic ancestry, utilization of personal genetic data in [clinical medication](#), moral, lawful, and social issues with individual genetic testing, Genetics underlying associations between hereditary variants and ailment defenselessness and medication reaction.

Genetics is study of heredity in general and of genes in particular. [Genetics](#) forms one of the central pillars of biology and overlaps with numerous different areas, for example agriculture, medicine, and biotechnology. [Genomics](#) is the investigation of entire genomes of living beings, and fuses components from genetics. Genomics uses a combination of recombinant DNA, [DNA sequencing](#) methods, and bioinformatics to sequence, assemble, and analyze the structure and function of genomes.

In addition to the informational speakers, you will get an opportunity to interact with and learn from our Business Partners, [Exhibitors and Sponsors](#). Also, you will get an opportunity to speak with them and personally evaluate if they can be helpful to our practices. And then there are our peers...the opportunities to get to know them and learn from each other during [networking breaks](#)

So, bookmark the dates: **July 27-28, 2020**; we assure you that [Genetics and Genomics 2020](#) would be a great learning and knowledge sharing experience. Keep your eyes peeled for more information to follow.

Glimpses of previous Conferences:

[World Summit on Genetics and Genomics](#) "Exploring Novel Therapies in Genetics and Genomics Research" will provides the premier interdisciplinary and multidisciplinary forum for [researchers](#), practitioners and educators to present and discuss the most recent innovations, trends, and concerns, practical challenges encountered and the solutions adopted in the field of Genetics and Genomics. The scientific program will feature live workshops, interactive education sessions, [B2B meetings](#), round-table discussions apart from the conventional [plenary sessions](#), featured symposia, breakout sessions and oral presentation sessions for abstracts and challenging cases.

We are looking forward to seeing you at **World Summit on Genetics and Genomics** in [Madrid, Spain](#).

Reach us for any queries!
