

Market Analysis Microbiology and Biotechnology 2020

Henryk Kalisz

Director, Enzymes4biotech Limited, UK, E-mail: hmk@enzymes4biotech.com

After the successful completion of the [Microbiology and Biotechnology](#) conference series, we are pleased to welcome you to the " **8th Global Conference on Applied Microbiology and Biotechnology**" The congress is scheduled to take place on June 24-25, 2020 in the beautiful city of Paris, France. This 2020 Microbiology and Biotechnology Conference will give you exemplary experience and great insights in the field of research.

The latest advances in microbiology and Biotechnology have a high impact towards industrial revolution and in medical microbiology to treat major diseases and common toxicities and also affects the foodstuff that people eat and are the source of key industrial products. Such a broad field requires a necessarily broad survey of the market opportunities and challenges that will arise in upcoming years. In the modern economic climate, your business decisions are very crucial. The 8th Global Conference on Applied Microbiology and Biotechnology will give an exciting opportunity to showcase the new technology, the new products of your company, and/or the service your industry may offer to a broad international audience. Conference Series LLC Ltd welcomes all the microbiologist, Biotechnologist, research scientists, research scholars, industrial professionals and student delegates from Microbiology and Healthcare sectors to be a part of the well-regarded Microbiology and Biotechnology 2019. This will be the best amalgamation of academia, industry and research linking every aspect of Microbiology and its related fields. It is open to all types of research processes both from academic world and business.

The global market of Bio-refinery technologies will grow from \$466.6 billion in 2016 to \$714.6 billion by 2021, with a compound annual growth rate (CAGR) of 8.9% for the period of 2016-2021.

The global market for microbiology technology, equipment, and consumables market reached \$9.8 billion in revenue in 2015. The market should reach nearly \$12.3 billion by 2020, increasing at a compound annual growth rate (CAGR) of 4.6% from 2015 to 2020.

The most important global single-cell proteomics market is expected to grow from \$555.3 million in 2017 to nearly \$1.6 billion in 2022, at a compound annual growth rate (CAGR) of 23.5% from 2017 to 2022.

The business market for fertility clinics in the US should reach a value of \$3.6 billion in 2017 and is expected to grow to \$4.5 billion by 2022 at a compound annual growth rate (CAGR) of 4.6% for the period of 2017-2022.
