

## Market Analysis of DRUG DISCOVERY CONGRESS 2020:

Zareen Delawar Hussain

Invicta Pharma Care LTD, Bangladesh, E-mail: [zareen123@hotmail.com](mailto:zareen123@hotmail.com)

PHARMACEUTICAL SCIENCES cover a wide range of research on the evaluation, diagnosis, prevention, and treatment of disorders, diseases and conditions of the body functions and their impact on the human body. The discipline of research on Nanomaterials has undergone changes in range, methods, instrumentation and technology which is propelled by increased awareness of quality care in Nanotechnology researches in the field of Nanotechnology. The field of Pharmaceutical Sciences is evolving at a rapid pace, with the introduction of several materials, instruments, and equipment's. However, there is minimum information of their relevance of [Pharmacy](#).

### Scope and Importance:

One in four individual in the globe will be affected by drug side effects at some point in their lives. Often, when a patient loses consciousness due to disease. Pharmacy is more vital to the common public than ever before, and with the rise of reported drug effect, it might seem a bit confusing as to why personalities still tend to ignore the consequences of leaving these symptoms crude, USD 8.67 billion in 2016 and is projected to reach USD 15.90 billion by 2025, growing at a CAGR of 6.97% from 2017 to 2025. A unique model is customized for each study. Gathered information for technology landscape, market dynamics, application development and pricing trends is fed into the model and analyzed simultaneously. These factors are studied on a comparative basis, and their impact over the forecast period is quantified with the help of correlation, regression and time series analysis. Market projecting is performed via a combination of economic tools, technological analysis, and industry experience and domain expertise. The global market for individual drugs was given as per the below, and as per the chart it describes the respective drug's market values in present economic year i.e., 2017 or 2018 in billion USD and expected growth rate by 2022 and 2023 and the CAGR is given in percentage growth.

### Role of Pharma in World:

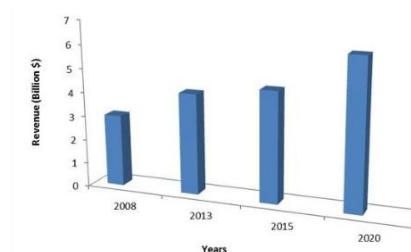

Pharma companies have always interacted with consumers. They have marketed directly to users, especially in the U.S., and they involve patients in clinical trials. They thus have some limited experience with

consumer-facing business models. In this new era, pharma companies will have to become more proactive with large communities of patients and go beyond lip service in meeting the needs of a wide swath of consumers.

### Drug Discovery Congress Market Analysis:

Countries with the highest per capita in the Pharmaceutical Industry

The United States is leading with \$339,694 million per capita through its pharmaceuticals market, followed by Japan in second place with \$94,025 million and China in third place with \$86,774 million.

Zareen Delawar Hussain will be taking privilege of felicitating organizing committee member. With the support of organizing committee, ME Conferences is organizing the upcoming event. We are honoured to schedule our next series "7th International Conference on Drug Discovery and Toxicology" during July 13-14, 2020 Helsinki, Finland
