

Market Analysis Of Glycobiology and Glycochemistry 2020

Dr. Alireza Heidari

Full Distinguished Professor and Academic Tenure of Chemistry & Director of the BioSpectroscopy Core Research Laboratory, Faculty of Chemistry, California South University (CSU), Irvine, California, USA, E-mail: scholar.researcher.scientist@gmail.com

The [global glycobiology market](#) is expected to reach USD 1,211.4 million by 2021 from USD 649.5 million in 2016, at a CAGR of 13.3%. Glycobiology is the study of carbohydrates and carbohydrate-containing biomolecules in biological processes. This study is used in diagnostics, drug discovery research, immunology, oncology, and various other applications. Glycobiology products are widely used for analysis of cell surface markers, which can act as diagnostic or therapeutic targets. The base year considered for the study is 2015, and the forecast has been provided for the period between 2016 and 2021.
