Market Analysis

Reproductive Medicine 2020 welcomes all the attendees, presenters and exhibitors from all over the world to Zurich, Switzerland. We are delighted to invite you all to attend and register for the "5th International Conferences on Reproductive Health and Medicine" which is going to be held June 23-24, 2019 Zurich, Switzerland.

Conference Series Ltd welcomes all the Gynecologists, Reproductive Endocrinologist, pathologists, research scholars, industrial professionals and student delegates from biomedical and healthcare, Reproductive Technologies sectors to be a part of the esteemed Reproductive Medicine 2020.

Reproductive health is a broad term and a large umbrella of topics are considered under this category. The reproductive system is a system of organs within an organism which work together for the purpose of reproduction. Many non-living substances such as fluids, hormones, and pheromones are also important accessories to the reproductive system. Unlike most organ systems, the sexes of differentiated species often have significant differences. These differences allow for a combination of genetic material between two individuals, which allows for the possibility of greater genetic fitness of the offspring. Diseases of the human reproductive system are very common and widespread, particularly communicable sexually transmitted diseases.

These would constitute a number of product categories and sub markets some of which are covered in market research reports. The term includes a variety of topics, such as pregnancy, fertility, menstruation and menopause, contraception, SIDS and HIV. The health and function of male and female reproductive systems would also be considered part of this category

Scope and Importance:

At Capital Women's Care, we encourage women to make their health a priority. Regular gynecological exams are an important part of women's health. This includes the pelvic exam to assess the health of your reproductive organs, the Pap test to identify abnormal cells in the cervix, and a breast exam.

Family history plays an important role in women's health. Family history can identify those with a higher risk of

developing disorders and diseases, including certain type of gynecologic cancers. It's worth gathering as much medical information as possible about your parents, grandparents, siblings, aunts and uncles (such as major medical issues, cause of death, and age of disease and/or death).

Why Zurich??

Zürich or Zurich is the largest city in Switzerland and the capital of the canton of Zürich. It is located in north-central Switzerland at the northwestern tip of Lake Zürich. The municipality has approximately 409,000 inhabitants, the urban agglomeration 1.315 million and the Zürich metropolitan area 1.83 million. Zürich is a hub for railways, roads, and air traffic. Both Zurich Airport and railway station are the largest and busiest in the country.

Permanently settled for over 2,000 years, Zürich was founded by the Romans, who, in 15 BC, called it Turicum. However, early settlements have been found dating back more than 6,400 years ago.[7] During the Middle Ages, Zürich gained the independent and privileged status of imperial immediacy and, in 1519, became a primary centre of the Protestant Reformation in Europe under the leadership of Huldrych Zwingli. The official language of Zürich is German, but the main spoken language is the local variant of the Alemannic Swiss German dialect, Zürich German.

Many museums and art galleries can be found in the city, including the Swiss National Museum, the Kunsthau and newer Theater 11 in Oerlikon. Schauspielhaus Zürich is one of the most important theatres in the German-speaking world.

The city of Zurich, a global center for banking and finance, lies at the north end of Lake Zurich in northern Switzerland. The picturesque lanes of the central Altstadt (Old Town), on either side of the Limmat River, reflect its pre-medieval history. Waterfront promenades like the Limmatquai follow the river toward the 17th-century Rathaus (town hall).

It is a leading global city and among the world's largest financial centres despite having a relatively small population. The city is home to many financial institutions and banking companies. Many of Switzerland's research and development centres are concentrated in the Greater

Zürich area and the low tax rates and canton funding subsidies attract overseas companies to set up their headquarters or finance treasury services in the city.

Monocle's 2012 "Quality of Life Survey" ranked Zürich first on a list of the top 25 cities in the world "to make a base within". According to several surveys from 2006 to 2008, Zürich was named the city with the best quality of life in the world as well as the wealthiest city in Europe in terms of GDP per capita.

Universities in Switzerland:
