

Mathematical Algorithm of Convolution Neural Network for Cancer Detection

Siddharth Madhav

Chief Technical Officer, Techno Hub Laboratories Private Limited, India

Abstract

Life is an equation, everything we see around us is a Mathematical Equation, right from picking up a pen to writing with a pen, from planting a tree to even cutting or watering it everything can be denoted in the form of a mathematical equation. Mathematical studies have given birth to many fascinating techniques in the field of Computer Science. Today the whole world is talking about Artificial Intelligence for disease detection and the hottest Topic on board is Cancer, so the goal of this Research Paper is to create and show a mathematical pattern of Convolutional Neural Network to detect Cancer
