

## Medical Professionalism among Medical Students and Faculty Members

**Dr Firdous Jahan**

Associate professor/ Chair Family Medicine department, College of Medicine and health Sciences, Sohar, Oman

### Abstract: Background

The goal of the medical profession is to provide best care for the patients. Teachers' professional attitude effects the learner as they see their role models behavior and they follow the same. There are various factors contributing to professionalism which may allow the development of more effective approaches in promoting the quality of medical education. The aim of this study was to recognize core element of professionalism in medical students and faculty and to compare students' and faculty perception regarding professionalism.

### Methods

The study comprised of a self-filled questionnaire survey of 109 students and 83 faculty members at Medical College. Statistical analysis was performed
