Editorial Note

I am glad to present volume 4, issue 2 on behalf of the coordinators as well as editors of the journal entitled "Journal of Nephrology and Urology (JPJNU)." JPJNU journal has been established in the past 2017 year and has successfully released 5 issues within the short span of time. The journal is currently indexed in various academic mediums and open access journals. JPJNU is completely an open access peer reviewed journal that deliberates on-going research works as well as progressions in analysis and controlling of kidney diseases and other related molecular genetics, pathophysiology, as well as epidemiology. The count of paper download has been rising high gradually with an average of more than 35 downloads per each page. All these positive points are the major signs the current journal growth. The major reason behind reaching this stage is the overall support that was provided by our contributors, editorial board members as well as readers. The key aim of this journal is to motivate various authors and their manuscripts from different areas of the research world that ultimately helps to enhance upcoming scientific community. Readers can observe advancements made in this way over the book reviews which are developing as a significant sector of this journal. I feel highly privileged to take this opportunity to thank every author who had contributed their research towards our journal and made it more successful as in international standards. Now we are expanding our editorial panel for addressing the breaks and issues to improve this journal. I would like to mention that, maximum articles received by various authors from several streams has been accepted and published in our journal well. Unfortunately few articles got rejected due to more plagiarism issue.

Journal is expressing huge respect towards their reviewers as well as editors. A few well professional personalities over the globe were observing our journals as editorial board committee for our journal. Our journal got best repeated reviewers in research community. Journal consists of vast amount of readers and well recognized authors. We are maintaining fast track peer review procedure for the received manuscripts and they are able to publish online within 15 days after final acceptance. JPJNU has reached too many authors, students, researchers through social media like twitter, LinkedIn for the better understanding and improvement of efficacy of journal. We are maintaining

appropriate format to publish received manuscript in online to make user and reader friendly. Our journal utilizing digital marketing which is rising high now a days to print articles in well recognized publisher such as "I Med Publications" for holding better appreciation to respective corresponding authors.

JPJNU is completely open access publication that concentrates on present research in analyzing kidney related issues. We motivate scholarly research community to their knowledge, research results and views globally. We are always happy to help our contributors and inspire the publications of qualitative scientific community. We are showing our deep gratitude towards the editorial as well as advisory committee of JPJNU for their deep efforts and support to carry out the volume 4, issue 2. We would like to add a few more attributes for the upcoming volume in 2020. We are assuring that, we will release more issues by the coming year compared to 2019 as well as 2020 by taking the kind support from editorial board, reviewers and authors respectively. Likewise, we will try to release a special issue by taking aid from contributes as well as editorial committee respectively.
