

Nursing Education and Research Conference Announcement

Paul Rega, Director, Department of Disaster Medicine, University of Toledo, USA E-mail: rega.paul.nursing@gmail.com

The purpose of Nursing Education is to enhance the development of the nursing profession by educating the nurses in their specific area. Nurse education places focus upon the use of evidence from research in order to rationalize nursing interventions. Nursing course is one of the cornerstones of the health care system. Nurses play an important role in health promotion, prevention strategies, and care of people. Nursing Education instruction comprises of the hypothetical and down to earth preparing furnished to medical attendants with the reason to set them up for their obligations as nursing care experts. Nursing research has a tremendous influence on current and future professional nursing practice, thus rendering it an essential component of the educational process nursing research is vital to the practice of professional nursing. Nursing research is research that provides evidence used to support nursing practices. Nursing Education instruction comprises of the hypothetical and down to earth preparing furnished to medical attendants with the reason to set them up for their obligations as nursing care experts.

EuroSciCon takes great pleasure in inviting the scientific community across the globe to the **29th Edition of World Congress on Nursing Education & Research** during May 25-26, 2020 at Dublin, Ireland. Dublin is the capital and largest city of Ireland. Dublin is considered as one of the best venues for conducting conferences due to its favorite tourist destinations. This meeting will explore advances in the [field of Nursing](#).

Theme: *Technology Innovations in Nursing Education and Better Health through Nursing Research.*

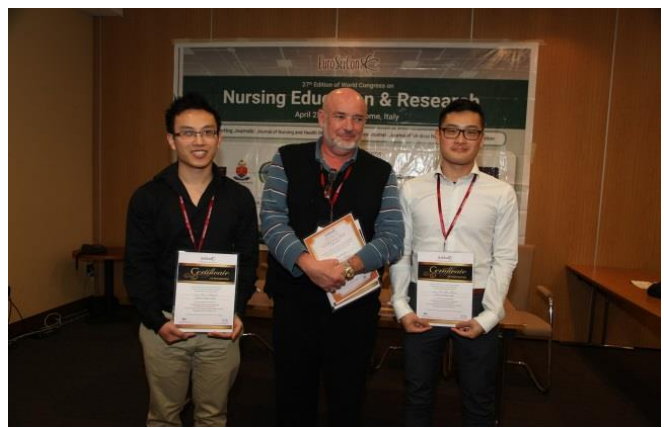

The upcoming [Nursing Education 2020](#) Conference aims to discover advances in health practice, management and education in relation to health disparities as well as a breadth of other topics. This conference will also present the advanced research, Novel Advancements and Therapeutic Acuties in [Nursing](#).

Nursing conferences will provide exposure to the possibilities in Nursing. Nursing Education 2020 gathers global leaders in nursing to meet and discuss the challenges and opportunities on several topics such as [Nursing Education and Research](#), [Nursing Informatics & Management](#), [Professional and Continuing Nursing Education](#), [Mental Health Nursing](#), [Midwifery & Women's Health](#), [Nursing Research and Evidence Based Practice](#), [Pediatric Nursing](#), [Oncology Nursing](#), Family Nursing, Public Health Nursing, [Cardiac Nursing](#), Holistic Nursing and many more interesting topics.

Glimpses of Nursing Education 2020:

Number of nurses, midwives and other health workers taken together are by far the largest professional group in the health workforce globally. In 2013 there were over 42 million health workers, according to WHO among them were 9.7 million doctors, 19.7 million nurses and midwives – just under half the total workforce – and 12.6 million health workers from other professions or with some level of training. WHO estimates health care is already a \$7.2 trillion a year industry, equivalent to 10.6% of global domestic product. On current trends the number of nurses and midwives in Africa will grow from 1.0 million to 1.5 million between 2013 and 2030, but the shortfall in the number required to meet the need will grow from 1.8 million today, to 2.8 million by 2030.

Join us to witness invaluable scientific discussions and add to the future advancements in the field of [Nursing Education and Research](#) in the upcoming “29th Edition of World Congress on Nursing Education & Research” which is going to be held during May 25-26, 2020 in Dublin, Ireland.
