

Oral Health screening status of Diabetes patients in Selected Hospitals of Addis Ababa

Addisu Tadesse Sahile

Department of Public Health, Unity University, Addis Ababa, Ethiopia

ABSTRACT: An institutional-based cross-sectional study was conducted on 388 diabetes patients selected on the bases of a systematic random sampling method from March to May 2018 at two selected public hospitals in Addis Ababa. Data were collected with a pre-tested, structured, and translated questionnaire. Bi-variable and multivariable logistics regression were undertaken to identify predictors of oral health screening among diabetes with their respective 95% CI and a p-value of less than 5% level of significance.

5. Biography Dr. Addisu Tadesse Sahile was graduated from Debre Berhan University in 2009 with Bachelor Degree, and in 2014 Master of Public Health (General) from Debre Markos University and GAMBY Health Science College Joint program, in Addis Ababa, Ethiopia.
