

## Past Conference Report on Glycobiology and Bio Informatics

**Dr. Muhammad Ishfaq Khan**, Assistant Professor Department of Weed Science, The University of Agriculture, Peshawar, Pakistan., E-mail: mishaq@aup.edu.pk

### About Conference:

The 4th Glycobiology World Congress will be held in Rome, Italy during September 17-19, 2018 organized by Conference series Llc Ltd Biochemistry Conferences will lay a idle platform for scientists, world-class professors, and glycobiologists to discuss an approach for glycobiology and its related research areas. International Glycobiology Conferences is designed to provide diverse and current education that will keep glycobiology professionals alongside of the issues related to research and development. The conference will impact an attractive moment to interact with professionals in the research field and therefore it takes a delight in opening a gate to meet young researchers and potential speakers where they can demonstrate their novel research and contributions in the field of glycobiology and biotechnology by Conference Series with the theme **"Glycobiology: The Study of Sweet Life"**.

### Why to attend???

Meet your target audience with members from around the world focused on learning about Biological research and growing market, this is your single best opportunity to reach the largest assemblage of participants from the scientific community. Conduct demonstrations, distribute information, meet with current and potential customers, and make a splash with a new product line, and receive name recognition at this 3-day event. World-renowned speakers, the most recent techniques, tactics, and the newest updates in Glycobiology growing market are hallmarks of this conference.

Be Part of it!

- This conference focusing on all the major aspects in the fields of Glycobiology and its allied research.
- It would be beneficial for all the students who ever willing to enter into research to the respective fields.
- As bringing the major research to the market and making it to utility are major focus for all the companies, this conference would be opportunity for the people in the respective fields.

### Target Audience:

Directors/Managers & Business Delegates, Director of Laboratories, Universities, Industries, Investigators, Post-Doctoral Fellows, Research and Diagnostic Laboratories, Clinical Fellows, Students and Biomedical Research companies.

Academia 60%

Industry 30%

Others 10%

The conference was initiated with the Excellencies of the keynote speakers.

- Robert Engel, Queens college, USA
- Julian Menter, morehouse school of medicine, USA
- Rosella Mollicone, University of Paris-Sud, France

### Market Report:

Glycobiology 2018 welcomes attendees, presenters and exhibitors from all over the world to Rome, Italy. We are delighted to invite you all to attend and register for the "4th Glycobiology World Congress which is going to be held during September 17-19, 2018 in Rome, Italy.

The organizing committee is gearing up for an exciting and informative conference program including plenary lectures, symposia, workshops on a variety of topics, poster presentations and various programs for participants from all over the world. We invite you to join us at the Glycobiology 2018 where you will be sure to have a meaningful experience with scholars from around the world. All the members of the Glycobiology 2018 organizing committee look forward to meeting you in Rome, Italy.

### Glance at Market of Glycobiology:

The technological progress in biochemistry and molecular biology has played a significant role in the development of the glycobiology market during the last decade. Also, the improvements in analytical instruments, and data processing and analysis software have contributed significantly in the advancement of the glycobiology field. The presence of research funding and government support for conducting research and commercialization of the products in the glycobiology market is the primary driver for the growth of this market. Glycobiology science is used extensively in biomarker discovery and drug assessment. Thus, the rapid growth experienced by pharmaceutical and biotechnology industries is assisting the growth of the glycobiology market.

### Supporting Journals:

- Journal of Biochemistry and Biotechnology
- Journal of Clinical and Bioanalytical Chemistry
