Editorial Note

I am cheerful to declare that Anatomical science and Research (IPJASR) is an international journal and that gave me chance to bring forward the achievements of the journal in the year 2019. The publisher of this journal is Imedpub. The iMedPub Journals publish original research papers of exceptional scientific significance. We will accept manuscripts of any length; we will promote the submission of both significant full-length research bodies and shorter manuscripts presenting innovative results that may be focused on a more restricted set of experiments.

IPJASR is an international journal and that gave me chance to bring forward the achievements of the journal is currently included in Index Copernicus database, Google Scholar, EBSCOhost™ databases. The entire issue was published by IPJASR at the time and the preprints were also released and dispatched online within 30 days after the article was published online. The Journal is aimed at researchers and various agencies interested in reviewing studies and theoretical papers at any level of education. Aims and reach The journal aims at publishing the most innovative and original work in all fields of Anatomical science and Research as research papers, review articles, case reports, brief communications, commentaries, photographs, video articles, etc. and offers free online access to it globally. The journal encourages high quality scholarly articles and reviews focused on topics of educational interest. The journal publishes state-of-the-art papers, theoretical analyses, meta-analytic research reviews, narrative reviews and best-evidence synthesis, research critics, forum posts, empirical reviews and thematic reviews.

IPJASR publish, support, and popularize Human physiology, a unique subject that apply the power of chemistry to deliver

profound insights into biological characteristic, and increase solutions for life sciences, biotechnology, and human fitness The journal doesn't limit its reporting to any age group. Articles regarding schooling are important across the developmental spectrum. The Journal accepts manuscripts submitted that meet the general standards of relevance and scientific excellence. Papers are to be released about a month after acceptance. All papers published in IPJASR are subject to peer-review. The consistency and review level of our publications is assured by our committed technical and editorial team members from various fields of Skin Care. Anatomical Science and research publishes original articles, reviews and letters to the editor. Because each report to be published online cumulatively covers 45 days from the date of receipt. The period for different processes including quality control, peer review, paper preparation is taken from 4 to 5 weeks. Quality reviews and peer review procedures are completed within 14 days, and the submission date is just 7 days after the reviewers and editors have approved the post. Articles published in the Journal Anatomical Science and research show substantial improvement on previously published studies, or carry new thoughts or observations that could have a strong impact in this field. A number of International Conferences are to be announced by IPJASR in 2020. I would like to acknowledge the contribution made by all the authors, reviewers and other supporting communities during the final editing of the articles published and the assistance provided by the editorial assistant in the timely resolution of IPJASR issues. I am very grateful to them for encouraging me to consider other peoples' work and development that make this journal a success.
