

The change of agriculture in the topics

The “**International Conference on Agro Ecology and Organic Farming**” hosted by conference series with the theme, “Exploring the future advancements in the field of Plant science Tissue Culture” was successfully executed during at August 24-25,2020 in Osaka, Japan. The conference offered a unique opportunity to investigators across the globe in order to meet, explore, network and perceive new scientific innovations. The conference received commendable and active participation was received from the Editorial Board Members of OMICS Group Journals as well as from the global scientists, Professors, Academicians, Researcher Scholars and students from diverse fields of **Agro Ecology and Organic Farming**.

The conference commenced with the presence of worthy Keynote forum and among the notable ones, few are listed below.

- “Identification of candidate genes involved in Arabidopsis responses to abiotic and biotic stresses using a transcriptomic approach (Synan F Abu Qamar). United Arab Emirates University, UAE”

- “Do riparian species like nitrogen (Eugenija Kupcinskiene Habil) Vytauto Didžiojo universitetas, Lithuania”

Conference series is organizing “**International Conference on Agro Ecology and Organic Farming**” which is going to be held on August 24-25, 2020 in Osaka, Japan. The conference is going to cover the entire field related to Food science, Agro ecology and Organic farming, latest research and findings. The Conference will provide a platform where research scholars and students will be able to gain knowledge about new, innovative research and findings from the eminent Scientist, Researchers and Professors.

The conference highlights of ORGANICFARM-2020 are as follows: **Agrochemical, Agro ecology, Crop protection, Plant Breeding, Plant tissue culture, Pesticides and Fertilizers, Organic farming, Plant Nursery, Agricultural Biotechnology, Greenhouse & Horticulture, Food science.**
