Editorial

The first article is by Edina Simon [1]. Prestigious Award for Young Research's at Environmental Toxicology 2020 - Discovering New Exploration in Environmental Sciences field. Environmental Sciences Conference Committee would be glad to give prestigious awards for talented young researchers, scientists, Young Investigators, Postgraduate students, Post-doctoral fellows, Trainees, Junior faculty in recognition of their outstanding contribution towards the conference theme. This platform provides a strong professional development opportunity for early career academicians by meeting experts to exchange and share their experiences on all aspects of Environmental Sciences. Awards for Young Researchers at Environmental Toxicology 2020: Young Researcher Forum - Outstanding Masters/Ph.D./Post Doctorate thesis work Presentation, only 25 presentations acceptable at the Environmental Toxicology 2020 young research forum.

Global warming is hot let it cool. The "6th World Conference on Climate Change" hosted by conference series with the theme, "An Insider's View of Climate Science, Politics, and Solutions" was successfully executed during September 02-03, 2019, Berlin, Germany. The conference offered a unique opportunity to investigators across the globe in order to meet, explore, network and perceive new scientific innovations. The conference received commendable and active participation was received from the Editorial Board Members of OMICS Group Journals as well as from the global scientists, Professors, Academicians, Researcher Scholars and students from diverse fields of Medical and Healthcare [2].

Let's act, to reduce Global Warming's effect. "Climate change is a result of the greatest market failure the world has seen. The evidence on the seriousness of the risks from inaction or delayed action is now overwhelming. We risk damages on a scale larger than the two world wars of the last century. The problem is global and the response must be collaboration on a global scale." He added that rich countries must lead the way in taking action. "That means adopting ambitious emissions reduction targets; encouraging effective market mechanisms; supporting programs to combat deforestation; promoting rapid technological progress to mitigate the effects of climate change;

and honoring their aid commitments to the developing world," he said. Sir Nicholas used the RES lecture - entitled, Climate Change, Ethics and the Economics of the Global Deal - to set out a six-point global deal for tackling climate change [3].

Refining Used Lube Oil and Industrial Gross Domestic Product Nexus in Tunisia Company of Lubricants. The present study intends to examine the links between industrial gross domestic product, skilled labor, invested capital and finished products for Tunisian Company of Lubricants on a temporal model over the 1980-2017 periods. Indeed, we demonstrate that the policy maker using capital and labor is essential to raise the industrial gross domestic product for this manufacturing sector by producing secondary materials and improving research activity. Our results imply that there is a great relationship among these variables, as a consequence of the benefits for re-refining used lube oil in economic growth of Tunisia. Finally, we find that our analytical framework is compliant with the empirical results [4].

Evolve: End Violence Against Animals. The organizing committee members of "International Conference on Animal Science and Animal Health Management" finally revealed the theme for this year's ANIMALSCIENCE-2020 and it is going to be theme "Emphasizing Major Significant Methods in Veterinary Medicine and Animal Research" Conference Series and the organizing committee of ANIMALSCIENCE-2020 acknowledges the efforts and contribution of scholars, researchers, academicians, and scientists in the field of Animal Science, Animal Husbandry and has decided to introduce various achievement awards for all the participants. ANIMALSCIENCE-2020 conference will offer various awards to outstanding researchers, scientists, exceptional graduates or early academicians who have a notable contribution to the field and possess keen interest towards the conference theme. The awards strive in providing a strong professional development opportunity for all researchers at different levels of their careers. Moreover, our conferences will provide a much-needed time and space for all to interact with colleagues from different parts of the world and to create long lasting networks and relations [5].

Young Research Forum – Young Scientist Awards: EnviTox Summit 2020, Tokyo, Japan, August 19-20, 2020. This Young Scientist Award is an initiative of Conference Series to recognize

and provide incentives to the Young Researchers who has shown great potential at their respective field of research. We at Conference Series always encourage the young budding minds to start their career in the field of research and innovations. The core of our Young Research Forum – Young Scientist Awards is to motivate the scholars to present their research ideas in front of the global experts and enhance their knowledge at our international platform. We at EnviTox Summit 2020 provide the best networking experience to the participant for their overall professional growth and to promote the collaborative research [6].
