

## 2020 Conference Webinar Announcement on 14<sup>th</sup> International Conference & Exhibition on Biosensors & Bioelectronics

**Biosensors & Bioelectronics 2020** is distinguished with the attendance of Organizing Committee Members and Editorial Board Members of supporting Journals, Scientists, young and brilliant researchers, business delegates and talented research student communities representing from developed and under developing countries, who made this conference rewarding and fecund. Conference the theme is *“Future trends development and new intervention in biosensors technologies”* offering a unique opportunity for investigators across the globe to connect, share, and perceive new scientific innovations.

The conference was initiated with the Honorable presence of the Keynote forum and Speakers forum with poster presentation. ConferenceSeries LLC Ltd is glad to announce 14<sup>th</sup> **International Conference & Exhibition on Biosensors & Bioelectronics** which is scheduled to be held during September 25-26, 2020 as a virtual event. Biosensors & Bioelectronics 2020 anticipates participants all around the globe with thought-provoking Keynote talks, Oral, Young Researcher Forum and ePoster presentations with Exhibition. The attending delegates include business, start-ups and research industries. It will provide a golden opportunity for investigators from all over the world to meet, network, and perceive new scientific interactions around the theme: **“Future trends development and new intervention in biosensors technologies”**.

Additional Special session on Covid19: **“Biosensor technologies for pandemic”**

Supporting association are **Kuwait Journal of Science (KJS)** and Engineering (KJSE, ISSN: 1024-8684), which has been in publication by the Academic Publication Council of Kuwait University since 1974, we are now publishing Kuwait Journal of Science (KJS) as an independent new Journal catering exclusively to a wide community of professionals in various disciplines of science.

This conference is going to cover the entire field related to **Biosensors, Biosensors Applications, Transducers in Biosensors, Biosensors in Healthcare, Biosensors for Imaging, Bioinstrumentation, Environmental Biosensors, Wearable Biosensors, BioMEMS/NEMS, Bioelectronics, Bioelectronics & Neuroprosthetics, Nanoelectronics, Lab-on-Chips and Nucleic Acid Sensors, Photonic Sensor Technologies, Gas Sensors, Advancement in Nanotechnology, Nanobiosensors & Nanosensors, Biosensing Technologies, Bioengineering Applications** and more.
