

Why are there blood types why did the antigens develop in the first place what account for difference in blood types what account for larger number of rarer non abo blood types what role blood types have in fighting disease

Dr. Kunal Joon

University : ST.Thomas Department : cardiology India

Abstract

Nourishment is the major source for serving wholesome needs, but with developing modernization, a few conventional ways are being given up. The abundance of the working populace with changing ways of life and decreasing the reasonableness of wiped out care, in terms of time and cash included, are a few of the strengths that are by and by driving individuals towards considering almost their wellness. There has been an expanded worldwide intrigue in conventional medication. Endeavours to screen and direct conventional home grown pharmaceuticals are underway.

Ayurveda, the conventional Indian pharmaceutical, remains the foremost old however living convention. Although India has been effective in advancing its treatments with more investigation and a science-based approach, it still needs a more broad investigation and proof base. Expanded side impacts need of corrective treatment for a few incessant maladies, tall fetched of modern drugs, microbial resistance and developing, illnesses are a few reasons for recharged open intrigued in complementary and elective medicines modes.
