Will the 2020's be the decade of Artificial Intelligence? Artificial Intelligence & Cognitive Technologies, Future of Work with the 4th Industrial Revolution.

Pinaki Laskar

GITAM (Deemed University), India

Abstract

How will AI, Deep learning and neural networks shape the next decade?

What will be the first industries to be affect: Transportation, health care, media or manufacturing?

How will our lives be affected and protected by and from the likes of Alexa, Siri, and Google Home?

Human vs. machine - who will take over who - what's gonna happen?

Shift towards 3rd Generation ANN.

8th Global Summit on Artificial Intelligence and Neural Networks; Webinar – June 18-19, 2020.

Artificial Intelligence & Cognitive Technologies, Future of Work with the 4th Industrial Revolution., Neural Networks 2020, 8th Global Summit on Artificial Intelligence and Neural Networks; Webinar – June 18-19, 2020 (https://neuralnetworks.conferenceseries.com/2020)

Biography:

Researcher & Founder, Inventor & Technologist, XAI Thought Leader & Innovator | Conscious Bio: Left & Right Brain thinker, Cells with positive energy, sanely creative daydreamer. I picture the world, or rather picture various worlds. It is a rhythm of perception, understanding and communication. A disruptive Innovator & cognitive Technologist, been the founding brain for many disruptive AI solutions Ranging from Autonomous Car and ITS, AI-based Agriculture and Healthcare. An expert and Distinguished Inventor in Artificial Intelligence and IOT with research in AI and Ethics. A thought leader and speaker at various conferences including 'Make in India', TIE and others with a work experience of two decades.
