The goal of occupational safety and health programs is to foster a safe and healthy work environment. OSH may also protect co-workers, family members, employers, customers, and many others who might be affected by the workplace environment. In the United States, the term occupational health and safety is referred to as [Occupational health](#) and occupational and non-occupational safety and includes safety for activities outside of work.

Healthcare workers are exposed to many hazards that can adversely affect their health and well-being. Long hours, physically demanding tasks, violence, and exposures to the infectious diseases and harmful chemicals are examples of hazards these workers at risk for illness and injury.

Public Safety refers to the welfare and protection of the general public. It is usually expressed as a governmental responsibility. Most states have departments for public safety. The primary goal of the department is prevention and protection of the public from dangers affecting safety such as crimes or disasters.

Occupational Health Hazards are defined as health hazards that been encountered at working sector that comprises of chemical hazards, noise pollution, psychological hazards, physical hazards, toxicological hazards, biological hazards etc. causing health issues as well as safety problems.

[Environmental Safety](#) and attention outline as a penalizing study that centered on applying sensible aspects of environmental protection and safety within the operating sector. In a means of easy shell defines that this can be all Organizations ought to follow to create certain safety and smart setting maintained in Working-Sectors that don't cause any harm to anyone. From viewpoint of health and safety, it explains to create organized efforts and procedures for documentation of workplace hazards, safety measures, reduction of accidents and exposures to harmful situations and substances. It conjointly involves coaching accident hindrance, safety precautions and emergency responses likewise as uses of protecting wear and instrumentation. Also from the Environmental point of

view, it involves by creating a systematic approach for complying environmental regulations such as waste management, waste air control and also health hazards issues all the thanks to keep operating setting smart and healthy. It conjointly complies with work engineering and Violence that been enforced and given so as to stay safety in operating sectors.
