

Conference Announcement on International Conference on Pharmaceutics and Drug Discovery on July 15-16, 2021

Journal: Chemical Biology and Pharmaceutical Chemistry

We are pleased to welcome you to the “ International Conference on Pharmaceutics and Drug discovery “ after the successful completion of the series of Euro pharma Congress. The congress is scheduled to take place in the beautiful city of London, UK , on July 15- 16, 2020. This euro Pharma 2020 conference will provide you with an exemplary research experience and huge ideas.

The perspective of the Euro Pharma Conference is to set up research to help people understand how Reserch techniques have advanced and how the field has developed in recent years.

Pharmaceutics is the discipline of pharmacy that deals with the process of turning a new chemical entity (NCE) or old drugs into a medication to be used safely and effectively by patients. It is also called the science of dosage form design.

The department is involved in teaching pharmaceutical analysis to the undergraduates. The curriculum includes extensive lectures and laboratory sessions to ensure that students can connect theory to practice and apply their theoretical knowledge gained. The field of pharmaceuti-

cal analysis is very dynamic and the curriculum ensures that the students are kept abreast with the latest development in this field. They are taught classical and modern analytical techniques including the application of sophisticated instruments like GC, HPLC, NMR, GC-MS, LC-MS etc. for drugs, pharmaceuticals and others..

To enhance the field and make people aware of it. The organizing committee decided to hold a conference. Euro Pharma is one of the fast growing and developing areas of Reserch.

People who have missed attending the past conference are most welcome to present your research ideas at the 2020 Euro Pharma conference. This conference will help you improve networking with eminent people in the field of Reserch.
