

I am pleased to mention that during the year 2020, all issues of volume 4 are publishing online well within the time and the print issue were also brought out and dispatched within 30 days of publishing the issue online, IPCN during this year also brought out a supplement to January 2021 issue, which consisted of abstracts of an international conference on Neuropsychology & a book review. Besides IPCN also brought out an online special issue in 2021. During the calendar year 2021, IPCN received papers, out of which 75% articles were rejected in the preliminary screening due to plagiarism or being out of the format, During 2021 around 50 articles were subjected to the peer review. In the 3 issue of volume 4 published during the year 2020. Average publication lag time of an article was further reduced to 4-6 weeks. I take this opportunity to acknowledge the contribution of Matthew David Dovel, Sam Vaknin during the final editing of articles published and the support rendered by the editorial assistant Vaitsa Giannouli in bringing out issues of IPCN on time, I would also like to express my gratitude to all the authors, reviewers, publishers, advisory and the editorial board of IPCN, the office bearers and the staff of imedpub secretariat for their support in bringing out yet another volume of IPCN and look forward to their unrelenting support to bring out rest of the issues of volume 4 of IPCN in schedule time.

Journal of Cognitive Neuropsychology aims to promote the research on human cognition based on neuropsychological methods comprising Cognitive neuroscience, Brain injury, Neurological illness, or the study of evolving Brain deficits. The research can encompass brain-lesion or neurologically-intact adults, children or non-human animals as long as it contributes to our understanding of normal human cognitive processes.

Journal of Cognitive Neuropsychology caters to cognitive scientists and neuroscientists, neuropsychologists, neurologists, psycholinguists, speech pathologists, speech therapists, physiotherapists, and psychiatrists.

Journal of Cognitive Neuropsychology focuses on a broad spectrum of issues and challenges related to human cognition by discussing on aspects like Neural data, Cognitive Neuro Psychology, Brain Injury, Cognitive Neuroscience, Neurological Illness, Aphasia, Neuro Imaging, Mental Illness, Cognitive Neuropsychiatry, Neuro Psychology, Adult NeuroPsychology, Memory Disorders, Cognitive Mental Illness, and Adolescent Psychiatry.

The Journal aims to publish the most reliable and complete source of information on discoveries and current developments in the form of research articles, review articles, case reports and short communication. All articles are peer reviewed and published under the guidance of our Editorial Board members on an open access platform. Submit manuscript by sending an e-mail attachment to the mail at neuropsychology@emedicinejournals.org
