Global Nursing Education 2020 aims to discover advances in health practice, management, and education in relation to health disparities as well as a breadth of other topics through oral and poster presentations, educational workshop sessions, and influential plenary presentations. Attendees will be provided with the tools to enhance nursing education programs to make education more effective in nursing practice.

The nursing profession has become both a science and an art. Nurses use evidence based knowledge, while conveying empathy, kindness and concern, to care for patients holistically. Nurses also play the role of educator, teaching patients and families ways to maintain optimal health by promoting wellness, educating about medications, health problems and measures to prevent complications from diseases. A nurse promotes, advocates for, and strives to protect the health, safety, and rights of the patient. Whether calling attention to a potential medication error, helping the rest of the health care team hear a patient’s voice or shaping policy by speaking from first-hand experience, patient advocacy is fundamental to nursing
