Raja TOUNSI, Gravity G-Tunis, Tunisia.

Introduction

Hypothesis

"The agent (Na⁺) acts permanently on the circulatory rotation of the neurons, which accentuates the operational deficiency of the cellular rhythm in the normal state, the agent (Ca) acts on the bone system and indirectly on the cardiac rhythm. Body gravity is based on the magnetic field of each neuron which provides the transmission of a bioelectric signal called nerve impulse. Neurons have two physiological properties: excitability or the ability to respond to stimuli and convert them to nerve impulses, and conductivity, which is the ability to transmit impulses into the body's energies constantly act on the circulatory rotation of neurons which accentuates the operational deficiency of the cellular rhythm in the normal state and creates the productivity of the mitochondria the powerhouse of the cells. This relativity provokes the law of body weight compared to atmospheric deficiency".

The human body encompasses three functional energies:

Body energies

Energy A

It is a substantial energy; it acts on the level of the blood circulation by allowing it to renew itself. The component cells circulate at a steady rate at the heart rate and react according to the intensity of the body's magnetic energy. It is the level crossing of the blood system, it deteriorates the infectious level of blood while proceeding to the multiplication of red and white blood cells, the functional of this energy are located at the level of the central axis of the liver. The substantial energy acts at the level of the blood

circulation allowing it to renew itself. The component cells circulate at a steady rate at the heart rate and react according to the intensity of the magnetic energy and that in the parallel direction of the sun. This explains that the rejection of toxins at the level of the lymph acts on the protection of the body from any destructive energy =Cognition

Energy B

It is functional and self-defense energy of the body, the rejection of toxins at the level of the lymph acts on the protection of the body from all destructive energy at the moment when the radioactive rays act directly on the vision of the producing cells. Females at the blood level =Body

Energy C

It is an impulsive energy that allows the elimination of any toxic body accessing the envelopment of neurons that are made of a very thin but very strong connective and protective tissue acting on the lymph. Its texture is formed from chromosomes very rich in proteins and iron, it mainly participates in the constitution of embryonic cells, this element projects rays that act directly on the gray matter fighting in this way any radioactivity or viral infection in the body for this reason, in the event of failure, a malfunction occurs which in turn causes the elimination of the agent, so a substantial imbalance in the bones appears. This imbalance subsequently affects the spinal cord and causes lesions via atmospheric radio active waves=Brain

Definition of Pain

Pain is a feeling of strong pressure that unites discomfort and

Choking from the outside to the inside with a higher than

normal vibration of the energy of the body which causes

cooling or warming of the affected tip.

Different types of pain:

- Pain is localized or spread = Inflammatory pain.
- Pain is transverse = Viral pain.

Gravity G-Therapy

Gravity G- is a Pain treatment product. It is capable, up to a certain point of going back to the cause and acting on it. It acts on several levels: it is recommended for its curative power, this

product is able to act on the nerve centers to annihilate the

perception of the pain or its translation in terms of intensity. When applied to the affected area of the body it will eliminate the pain, it is designed to eliminate pain in extreme intensity, it is the fruit of many years of researches. As a result of my study pain is caused by an external environment originating from an atmospheric

failure, affecting in depth the body energetic metabolism.

Gravity G- is a Remedy that is placed under an external application that reacts on the lymph and spreads to the Gray matter. Its active effect at the level of the organism will not allow any shaking of the defensive cells at the level of the organism and reacts directly on the gray matter and acts on the heart and cell rhythm and goes up to the neurons. Gravity G-'s components are natural, free from any chemical materials give a tenacity and

rebalances the body energies that leaves place for remarkable body immunity. Gravity G- formula

eliminates pain in an immediate and lasting way. Gravity G- shower or bath capsule is preferable for critical pains to be used in Balneotherapy and Thalassotherapy to give you vitality and energy, contain a creamy gel with a pleasant scent of natural plants and extracts of essential oils.

Conclusion

Pain is an infection caused by an external atmospheric virus

originating from an atmospheric failure and affecting in depth

the body metabolism. The cure must be fixed on a Remedy

that is place under an external application that reacts on the

lymph. Its active effect at the level of the organism will not

allow any shaking of the defensive cells at the level of the

organism and act on the heart and cell rhythm and goes up to

the neurons. Gravity G- composition is natural it gives

tenacity and rebalances the body energies that leaves place for

a remarkable body immunity.
