**Received:** August 26, 2017; **Accepted:** August 26, 2017; **Published:** September 02, 2017

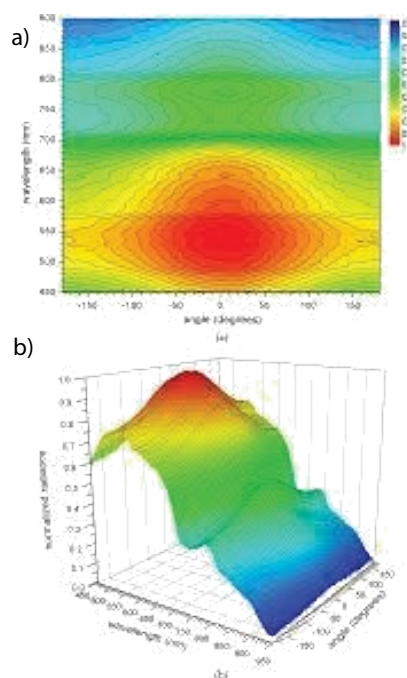

In the following images, we present different high-resolution simulations of medical, medicinal, clinical, pharmaceutical and therapeutics oncology of human lung cancer translational anti-cancer Nano drugs delivery treatment process under synchrotron and X-Ray radiations (**Figure 1**) [1-8].

Furthermore, we simulated synchrotron and X-Ray radiations in this treatment process type according to the following plots respectively (**Figure 2**) [1-8].
