According to Baalwa (2010): Prevalence of overweight and obesity in young adults in Uganda; the overall prevalence of obesity and overweight was 2.3% and 10.4%, respectively. The prevalence of obesity was 4.4% in Kampala. Obesity among children is also on the rise and is a common cause of type 2 diabetes and many cardiovascular conditions†. Uganda needs a consumer protection law to avert child obesity. The 28th of July 2015 saw Uganda’s parliament pass the 2014 Tobacco control Bill (TCB). This public health triumph depended on CSOs high impact social mobilisation against MPs calling on them to pass the TCB, owing to their legislating role provided in article 79 of the constitution. The Bill awaits the presidential assent for consequential implementation and enforcement.

Biography – Moses Talibita Lawyer at Uganda National Health Consumers’ Organisation, Uganda National Health Users'/Consumers' Organization (UNHCO) is Non-Governmental, Not for profit Advocacy Organisation formed in 1999 to provide an institutionalized platform for health care users in Uganda to voice their concerns.
