

## Webinar Report on Microfluidics & Nanofluidics

Meetings International proudly announces Successfully completed the webinar on “Microfluidics & Nanofluidics” which is scheduled during September 25, 2020 and it will be organized on the theme “an approach to better understand the micro mechanics of fluids”. This webinar invites all the participants worldwide which includes keynote presentations, Oral talks etc. You will be sure to have a meaningful experience with scholars from all around the world. This Webinar is to unite globally recognized scholastics in the field of Microfluidics & Nanofluidics, experts, specialists, scholarly researchers, industry analysts, researchers to trade about best in class research and advances. This gathering is to provide new ideas for treatment that will be valuable over the range of Microfluidics & Nanofluidics

### Scientific Sessions:

- Microfluidics Research & Advances
- Biosensors & Lab-on-a-Chip Technologies
- 3D-Printing of Microfluidics Devices
- Droplet-based, Digital & Centrifugal Microfluidics
- Tissue Engineering
- Droplet-Based Microfluidics
- Nanofluidics & Fluid Dynamics
- Novel Micro Sampling, Separation & Detections
- Point of Care Technologies
- Microfluidics in Drug Delivery & Formulations

### Speakers:

1. Steven A. Soper, The University of Kansas, USA
2. Li Zhnag, East China University of Science and Technology, China
3. Theo Guillerm, PolyPico Technologies Ltd, Ireland
4. Hamid Sadabadi, Wireless Fluidics Inc, Canada
5. Afshin Abrishamkar, PSL Research University, France
6. Mina Hoorfar, The University of British Columbia, Canada
7. Bahram Talebjedi, The University of British Columbia, Canada
